COMPETITION CATEGORIES AND CLASSIFICATIONS

Competitions:

The KAA wants to provide an enjoyable competitive environment for all para-archers. This event is therefore split into two separate competitions that will take place together at the same time – you need to specify on the entry form which one you want to enter:

County Championship: To take part in the County Championship, you will need to:

- be a member of the KAA, either through your club or as a Direct Member **and**

- hold a current ArcheryGB classification document (to be shown at registration) **and**
- shoot the specified round.

Categories:

Please note that competition categories might be combined at the discretion of the tournament organiser, where the number of entries is particularly low.

Open categories: Archers with any type of disability, in separate categories for each of the specified bow-styles – bow-styles are as defined in the ArcheryGB Rules of Shooting.

ARW1/ARW2: A single competition category for archers of either of these disability classifications, shooting any accepted bow-style. Note that compound bows in this category are limited to 35lb peek draw weight for ladies and 45lb for gentlemen; they cannot have either a peep-sight or scope, but can be shot with a release aid.

Visually Impaired: Archers with a B1 sight classification must wear blackouts from setting up any equipment until the end of the competition. Archers in the VI 1 Shooting Category will aim using a tactile sighting device s.Archers in the VI 2/3 Shooting Category will aim/sight using a tactile sighting device complying with the relevant rules.

Simple Guide to Para-Archery Classifications:

The following definitions are taken from the 'IPC Layman's Guide to Paralympic Classification'. Further guidance is also now available from the 'Para-Archery' section of the World Archery website, following transfer of responsibility to them during 2012.

Archery Standing (ARST): The sport class ARST includes athletes competing in a standing position and those who require some standing support because of poor balance. They either have a leg-length difference, limb deficiency or impairments that also affect their arms and trunk.

Wheelchair 1 (ARW1): Archers in this sport class compete in a wheelchair because their impairment includes the loss of leg and trunk function. Also, their arms show a loss of muscle strength, co-ordination or range of movement. For example, one condition that might fit this sport class profile is tetraplegia.

Wheelchair 2 (ARW2): Similar to archers in the sport class ARW1, archers in this sport class have a strong activity limitation in their trunk and legs and compete in a wheelchair. Their arms however, show normal function. This profile would likely apply to paraplegic archers.
